

SWE212: DISTRIBUTED INFORMATION MANAGEMENT SYSTEMS (DIMS)

Project Studies 2025

You will work on the projects in groups of 4 or 5 until the end of the semester. Each group will choose a topic from the list given below and will work on a different problem on each project with the same topic. Project work will be evaluated 4 times during the semester, and evaluations will be made in the classroom. Each group will show their work in 10-minute presentation.

We will make an exemplary project in the class that will form the basis of your project study. What is expected from you is to apply things on your project that you have learned in the class.

No	Project description	E-R Diagram
	THIS IS EXAMPLE PROJECT Car rental: In class example, Customers-Vehicles assignment Join: Rentals	 <p>Join: Rentals (Rent date, Return date, Is returned)</p>
